Coding Mantis

COURSE EXCERPT · MODULE 7

The same question, yet again. Your AI assistant writes the draft.

Based on your own service terms, no code. You just check and send.

BEFORE

CLIENT'S EMAIL · MADE-UP EXAMPLE

"Hello! We'd like to order a sketch of our premises. What should we send? Can you do it by Friday?"

You open the terms, find the answer and write the same reply again.

YOUR REPLY

⊗ A blank page every time. In a rush it is easy to promise Friday.

AFTER – THE ASSISTANT'S DRAFT

Subject: Input for the sketch

Fictional studio "Clear Rooms" · draft for your review

Hello! For the sketch we need **a floor plan and a list of your needs**. Then we will assess the scope.

You asked for Friday. **The project manager will confirm the delivery date.**

SOURCE	studio-terms-2026-10-01.txt – your file, not the internet.
NO PROMISE	**No Friday promise – the date is confirmed first.** No invented dates or prices.
YOUR PART	Read, check, send.

● Example is in the course ● Claude or ChatGPT Projects

✓ The reply follows your terms, with no invented promises. You only check.

01 Upload a file
Service terms, tone, form of address – plain text.

02 Paste the instruction
Template from the course; swap the [square brackets] for your own work.

03 Test 20 tasks
Table in the course. No invented dates or prices? Use it.
